August 1, 2019

To our valued water customers:

The WPCA is looking for volunteers to help with collecting water samples to be tested for lead and copper, as required by Connecticut and Federal law.

The lead and copper content we are required to test for does NOT come from the water itself, but can leach from the plumbing in individual homes when the water sits unused (if the conditions are right). Steps have been taken to minimize that possibility, but we must demonstrate that the steps we have taken are effective.

A sample bottle will be dropped off and left on door step at your house the day before with directions. The sample bottle and paperwork can be left out where you found this bottle, and we will pick it up the following morning.

Please contact me if are willing to volunteer and your house qualifies. If you have any question, call me at **(860)848-3830 Ext 5** and we will be glad to help.

Sincerely,

Jon Lilly  
Chief Water Operator
